Summary

Award-winning (iF Design Award, Red Dot x2) with a foundation in industrial design and hands-on UI/UX experience across web and app projects. Skilled in user research, journey mapping, usability testing, and translating pain points into intuitive interfaces, backed Figma, front-end coding & rapid prototyping. Proven track record leading design projects from concept to launch with cross-functional & cross-border teams.

Skills & Interests

Skills: Vibe coding (ChatGPT, Claude AI), 3D Modeling (Rhino), 3D Rendering (Keyshot), UI/UX (Figma), Coding (JavaScript, Python, CSS, HTML), 3D Printing & Prototyping (Bambu Studio), Graphic Design (Photoshop, Illustrator)

Interests: User Experience Design, Product Strategy & Project Management, 3D Printing & Digital Fabrication, AI-Assisted Creative Workflows, Social Media Content Creation, Chess & Analytical Thinking, Magic

Employment History

Sudokoo - Industrial Designer · UX · Human-Centred Design

September 2024 - June 2026

- Led the end-to-end design of consumer PC hardware including computer chassis, air coolers, AIO liquid coolers, and OEM solutions. Balanced user needs, engineering constraints, aesthetics, and business objectives.
- Spearheaded the development of the flagship SK620 and SK700 cooler series across four product variants, guiding projects from concept through manufacturing and market launch; products received the 2026 iF Design Award and 2026 Red Dot Design Award.
- Conducted user research, installation studies, and usability evaluations to identify friction points in the PC-building experience, redesigning installation workflows and physical interactions that contributed to 99% positive reception from leading technology reviewers and enthusiast communities.
- Accelerated design validation and decision-making through rapid visualization, 3D CAD modeling, and 3D printing prototyping workflows, reducing design iteration cycles by 65%.
- Developed production-ready concepts through CAD, CMF exploration, and prototyping, enabling faster engineering evaluation and manufacturing readiness.
- Partnered with cross-functional teams across Singapore and China, including engineering, manufacturing and marketing. To align technical feasibility with user experience throughout the product development lifecycle.
- Represented the company at the CES 2026 and Computex 2025, showcasing flagship products and strengthening engagement with industry partners, customers, and media.

DeepCool - Industrial Designer · UX · Human-Centred Design

March 2024 - September 2024

- Designed and developed PC hardware products across chassis, air coolers, and AIO cooling systems, contributing to multiple design directions that supported stakeholder decision-making across product development cycles.
- Led the end-to-end development of the LM240 and LM360 AIO cooling series, guiding projects from concept through manufacturing and launch while coordinating cross-functional stakeholders.
- Improved installation and onboarding experiences by analyzing user journeys and identifying key usability pain points, resulting in a more flexible installation process with fewer clearance constraints and smoother overall setup.
- Accelerated product development through CAD modeling, DFM optimization, CMF exploration, and rapid prototyping, enabling faster design validation and production readiness.
- Coordinated engineers, designers, and suppliers across China and Singapore, ensuring alignment and timely execution of product milestones.
- Balanced user experience, aesthetics, engineering requirements, and commercial objectives to deliver products that met performance and manufacturing standards.

National University of Singapore (NUS) - Product Designer (UI/UX)

September 2022 - July 2023

- Designed and managed digital landing pages supporting educational and professional development initiatives, serving dozens of prospective learners and stakeholders.
- Improved information accessibility and user experience by translating stakeholder requirements into structured webpage architectures and user journeys.
- Produced marketing collateral and brochures that supported programme outreach efforts and engagement with hundreds of participants.
- Enhanced webpage usability by evaluating content organization, layouts, and navigation flows, resulting in increased engagement and leads.
- Coordinated cross-functional stakeholders to deliver consistent digital communications across multiple platforms and campaigns.

Razer Inc. - Design Consultant

August 2021 - November 2021

- Influenced product, retail, and visual design decisions by providing strategic recommendations to stakeholders across multiple initiatives.
- Evaluated design concepts from user experience, business, and implementation perspectives, helping prioritize solutions aligned with project objectives.
- Created visualizations and executive presentations that supported stakeholder alignment and informed key design decisions.
- Identified opportunities to improve retail experiences through customer journey analysis and stakeholder collaboration.

Razer Inc. - Visual Merchandising and Retail Design Intern

May 2021 - July 2021

- Produced visualization work for the development of the Razer Café, helping communicate spatial concepts and design intent for stakeholder review and refinement.
- Supported visual merchandising initiatives across retail locations, ensuring consistent brand presentation and elevated customer experience across touchpoints.
- Conducted retail journey mapping and product interaction research to better understand customer behavior, translating insights into experience design recommendations.
- Assisted in retail rollout execution, including artwork preparation, procurement coordination, and deployment planning to ensure timely store implementations.
- Contributed to retail and spatial design development by creating interior design concepts and visualizations using tools such as Twinmotion, supporting design exploration and presentation.

Omni Remotes - Industrial Designer Intern

September 2017 - November 2017

- Earned an invitation to continue a collaborative industry project based on strong school project performance and stakeholder feedback.
- Presented design concepts and recommendations to senior stakeholders at the company's headquarters in Suzhou.
- Identified manufacturing challenges and process improvement opportunities through production floor observations and evaluations.
- Improved process documentation by recording product development workflows and quality control procedures to support consistency and standardization.
- Supported product development activities through design validation, manufacturing analysis, and stakeholder communication.

Education

National University of Singapore - B.A. Industrial Design - High Distinction, CAP 4.34

August 2020 - May 2023

- Independently designed “Eclipur” luminary concept, a university project that received the Red Dot Design Award (2021).
- Designed an emergency response mobile app (UI/UX) as part of coursework, focusing on usability, clarity of interaction, and information hierarchy under high-stress scenarios.
- Conducted a final-year thesis on emotion measurement and visualization, translating raw emotional data into an interactive app (UI/UX) that mapped and tagged emotions to images for behavioral interpretation.
- Served as Design Head, Eusoff Works, leading a team of 8 in executing hall-wide design initiatives including poster campaigns, merchandise (CCA T-shirts), and yearbook design, ensuring consistent visual identity across platforms.
- Contributed to EHOC Publicity Team, developing marketing campaigns and designing official camp merchandise, including camp T-shirts, to support engagement and outreach for hall orientation activities.
- Worked as an Orientation Group Leader (FOP, NUS), facilitating and guiding incoming freshmen through orientation activities, supporting their transition into university life and community integration.

Awards

- iF Design Concept Award 2026
- Red Dot Design Concept Award 2026
- Red Dot Design Concept Award 2021
- Motorola Solutions Award 2018
- Omni Remotes 1st Runner Up Design Award 2017
